OUTLINE GUIDE
Section 19, Chapter I

A. General

This Subsection is an introduction rather than a summary of what is included in the following Subsections. Include general statements as to the amount and quality of maps, charts, and aerial photography, as well as the adequacy of survey data. Include any additional significant factors pertinent to the NIS Area, such as security restrictions placed on the release of maps and emphasis on particular types of mapping and charting.

B. Surveys and aerial photography

Discuss briefly the geodetic, gravimetric, hydrographic, and oceanographic surveys that have resulted in basic mapping and charting data. Include also general statements concerning aerial-photography coverage, indicating the type, recency, and quality.

C. Maps and charts

Include under each of the subheadings summary statements concerning the adequacy of content and completeness of areal coverage of maps or charts for the subjects indicated. Discuss also the chief deficiencies. Present information in generalized form; avoid excessive detail.

D. Programs under way

Discuss only the most significant surveying, aerial photography, and mapping and charting programs known to be under way. Reported or projected programs should be omitted.

ADDITIONAL COMMENT

Suggest inclusion of a statement in paragraph 2 under "Sections 12-19" (which is to be retained) to the effect that significant developments since the publication of the respective Chapters are to be incorporated in Sections 12-19 and that the cutoff date of information is to be one month prior to the date the Subsection is due.
